HD Remote Production Vehicle

TV-3

Touring Video's TV-3 production trailer is a HD-digital mobile production facility. Designed specifically for the entertainment industry, this 43' expando trailer features a large control room with three rows of production consoles that can accommodate twelve or more personnel. Its futuristic interior design provides an exciting change from the typical remote television truck. Besides providing reliable equipment and knowledgeable staff, we strive to make the entire production experience comfortable.

TV-3 features a Sony MVS-7000x HD switcher. This 6ME Multi-Format production switcher features four built-in DME, Frame Store, and 48 assignable Aux outputs. The switcher includes Multi-Program Two software that provides 6 additional transition engines for even more functionality.

TV-3 is available in a variety of formats. These include 1080i/59,94 , 1080p /59.94 Level A 1080p/29.97, 720p/60, & 1080p/23.98psf. We offer several HD recording formats including Sony XD Cam, Sony HD-Cam and Aja Ki-Pros. 3G 1080p60 recording options , EVS XT3 and Aja Ki Pro Ultra Plus

The communication network consists of a Riedel Artist digital matrix intercom system interfaced with 9 channels of Wet RTS, 4 IFB's, SA, and 4 Telos intercom/phone interfaces. Redundant dual ring fiber optical network for Riedel frame interfacing.

The audio room features a spacious mixing booth with a Stagetec Crescendo 40 fader digital console with 120 input channels. Outboard gear includes Waves Server Extreme Sound Grid w/ plug ins including Dugan Automixer, Sound Devices 970 MADI recorder , Instant Replay and Cedar Noise Reduction.

In TV-3 the synergy between technology, design, and personnel provides a unique experience in the mobile production industry. Please see our TV-3 PDF spec sheet for more information, including floor plan and a complete list of equipment.
